NOTE: The solid hardwoods used in Prestige cabinets are joined with time-tested methods which have been used for centuries by skilled craftsmen of fine furniture and cabinetry. However, all solid woods will expand and contract with changes in temperature and humidity. In winter weather, when humidity is low, contraction may cause a narrow unfinished line to appear on raised panel doors. To allow continuous product refinement, Prestige reserves the right to alter cabinet specifications and styles without general notice or obligation to make similar changes in products previously produced. Illustrations and photographs offered are not binding in all detail, and color deviations are possible.
